

Respiratory and Exercise Research Laboratory

Dr. Mohammad Hossein Boskabady

Asthma and COPD inducing setup

Asthma and COPD inducing setup

A setup to study effects of exercise in different experimental models in lab animals (rats and mice)

A setup to study effects of exercise in human models

Tunturi exercise bike

Pulse oximeter

Respirometer

A setup to study relaxant effects of different substances and evaluating tracheal response in lab animals

A setup to study relaxant effects of different substances and evaluating tracheal response in lab animals

A setup to study relaxant effects of different substances and evaluating tracheal response in lab animals

A setup to study relaxant effects of different substances and evaluating tracheal response in lab animals

A setup to study the impact of different agents on tracheal resistance of lab animals in vivo situation

Body plethysmograph for measuring changes in lung volume and airway resistance
